EXPERIENCE

EPAM | Sr. Software Engineer
June 2022 – current | Pune
Project: Network Security

- **UI Development & Customization**: Led the development of advanced, customizable UI components such as actionable, filterable tables, cards, charts, and interactive dashboards for network security application, ensuring dynamic data visualization and a seamless user experience.
- **Data-Intensive Application**: Led the development of a data-heavy module by implementing the Model Adapter Pattern for robust data modeling and ensuring efficient, maintainable data flow across the application.
- **Data Visualization & Insights**: Developed interactive DNS traffic visualization using Apache ECharts, delivering actionable insights through real-time data representation.
- **Optimized Data Fetching**: Integrated Cube.js for efficient data fetching and processing, significantly improving the application's scalability and performance in handling large data sets.
- **UX Collaboration & Consistency**: Worked closely with the UX team to ensure all UI components followed design consistency, usability, and core library standards, maintaining high alignment with UX best practices.

GENPACT | UI Consultant
March 2021 – June 2022 | Gurugram

Project: Manufacturing

- **Digitized Manufacturing Operations**: Led the digitization of manufacturing processes for a multinational corporation, focusing on user experience and improving efficiency through system automation.
- **Voucher Module Development**: Architected and developed a labor/operator voucher module using RxJS, NgRx, and micro-frontends, transforming a manual process into an organized, digital solution that boosted productivity.
- **Micro-Frontend & Collaboration**: Implemented micro-frontends architecture for modular UI development and collaborated with cross-functional teams to deliver scalable, user-centric solutions, maintaining high coding standards.

TATA CONSULTANCY SERVICES | Front End Developer
Dec 2017 – March 2021 | Indore

Project: Banking and Insurance

- Participated in the end-to-end development of an insurance product, adhering to strict deadlines and coding standards.
- Automated customer data verification via Kofax integration, optimizing operational efficiency.
- Established a centralized reactive form validation module to ensure reusability.
- Played a key role in designing the initial application architecture, prioritizing scalability and maintainability.

EDUCATION

ACADEMICS
Bachelor Of Engineering in Electrical And Electronics Engineering (CGPA: 7.49)
2017 | Oriental Institute Of Science And Technology, Bhopal
Kendriya Vidyalaya(12'th), Damoh | 2012
percentage: 71.4

SKILLS

PROGRAMMING
- Angular
- React
- Javascript/Typescript
- Ngrx, Redux (State Management)
- Jasmine and Karma (Unit Testing)
- Nodejs, Express
- Html5/CSS3/SCSS/LESS
- Micro-Frontend
- Data Structures and Algorithms

TECHNOLOGY
- Git/Github • Jenkins
- Artificial Intelligence
- Apache e-charts

RECOGNITION

AWARDS
- Epam Delivery Excellence Award
- Infoblox Hero Award(Twice)
- Infoblox Delivery Excellence Award
- TCS Star Team Award (Twice)
- TCS Maitree Award (Thrice)
- Nodal handball tournament (Twice)
