Anuj Parashar

Senior UI Engineer • Angular & TypeScript • Pune, India

anuj.parashar.140@gmail.com | +918878286663 | *LinkedIn* | *Github* | *Portfolio*

Summary

Senior UI Engineer with 8+ years of experience building and modernizing large enterprise web applications in Angular (v15–v21), TypeScript, and modern JavaScript. Work spans design systems, micro-frontend architecture (single-spa), front-end performance, and data-heavy dashboards. Recent work includes the UI and chart integration for an LLM-powered conversational assistant, and daily use of AI coding tools in development and code review.

Experience

EPAM Systems, Pune Jun 2022 – Present

Senior Frontend Engineer

BloxOne Cloud Services Portal, Network Security & DNS Analytics Platform

Tech: Angular (v15→21), TypeScript, RxJS, NgRx, SSE, Storybook, ECharts, Cube.js, single-spa, Jest, Playwright, GitHub Actions

- Architected and maintained **30+ independently deployable Angular micro-frontends** (single-spa) across DNS, DHCP, IPAM, and Threat Defense, enabling independent team releases.
- Built an in-house **Angular component library and design system** (30+ components including data tables, wizards, and a filter engine) with theming, dark mode, and Storybook documentation, reducing per-feature build time.
- Built the UI for an **LLM-powered conversational assistant** used across products: SSE-streamed responses, partial-answer and error states, response actions (copy, feedback, branch), and i18n.
- Defined the chart tool contract between the Python AI backend and the UI (chart type enum, pre-sorted data, category totals); made chart series distinguishable by pattern and shape, not color alone, for accessibility.
- Extracted Threat Defense into a standalone micro-frontend (repo, CI/CD, Helm chart, routing, auth and feature-flag wiring) and moved micro-frontends onto a global chat host with shared state.
- Delivered Threat Defense and DDI features and real-time analytics dashboards (ECharts, Cube.js) over REST APIs, handling large datasets with RxJS and NgRx.
- Led the **Angular 15→21 migration** with automated tooling, improving performance with OnPush, lazy loading, code splitting, and zoneless change detection. Standardized CI/CD with reusable GitHub Actions and Helm/Kubernetes; automated unit, integration, and E2E tests (Jest, Playwright).
- Use Claude Code for implementation and PR review; wrote Claude rules that enforce translation parity and analytics coverage. Lead code reviews and partner with UX, product, and backend engineers.

Genpact, Gurugram Mar 2021 – Jun 2022

UI Consultant

Manufacturing Digitization Platform (Aerospace Industry)

Tech: Angular, RxJS, NgRx, Micro-Frontend

- Led a team of 5 engineers to re-architect a legacy manufacturing application into micro-frontends, eliminating cross-team blockers and enabling parallel module delivery.
- Delivered a labor/operator voucher module (Angular, RxJS, NgRx) and standardized shared UI components across teams, digitizing shop-floor workflows and reducing errors by ∼25%.

Tata Consultancy Services, Indore Dec 2017 – Mar 2021

Frontend Developer

Banking and Insurance Platform

Tech: Angular, TypeScript, HTML5, CSS3, REST APIs

- Owned reusable Angular onboarding forms for Aviva's insurance platform across the customer lifecycle; contributed to the initial frontend architecture.
- Integrated Kofax-based automated KYC into the onboarding flow, reducing customer onboarding time by ∼50%.

Skills

Core Web: JavaScript (ES6+), TypeScript, Semantic HTML5, CSS3, SCSS, Responsive Design, Cross-Browser, Accessibility
Frameworks & Architecture: Angular (v15–21), React, RxJS, NgRx, Micro-Frontends, Design Systems
AI & Real-time: LLM-powered UI, SSE Streaming, Conversational Interfaces, Claude Code, GitHub Copilot, ChatGPT
Performance & Data: Lazy Loading, Code Splitting, OnPush / Zoneless, REST APIs, ECharts, Cube.js
Testing & Build: Jest, Playwright, Storybook, GitHub Actions (CI/CD), Helm, Kubernetes, Docker, Git
Backend & Design: Python, Go, Node.js, Express.js, AEM, Figma (design-to-dev), i18n

Education & Recognition

B.E. in Electrical & Electronics Engineering, Oriental Institute of Science & Technology, Bhopal 2017

EPAM Delivery Excellence Award *InfobloxHeroAward*(2×) *TCSStarTeamAward*(2×)
